Improvement Projects

Improvement Projects

- Every organization needs to continually improve its processes to be successful in today's competitive markets.
- There are various tools used for improvements such as
 - Lean Manufacturing
 - 5S
 - Kaizen
 - Quality Circle
 - Performance Improvement Program (PIP)
 - Six Sigma
 - TPM/ OEE
 - Etc.
- Organisations need to continually improve by using any chosen methodology and track their performance.

Above module facilitates tracking of improvement projects, setting targets based on past performance/ benchmark data, assigning resources, responsibilities and monitor the same.
