## Supplier Management

## Supplier Management

- Every organization may be dependent on external suppliers. Selection of supplier is very important for the success of the organization.
- An organization can start using a new supplier based on market reputation, proximity to your plant or other reasons.
- Normally, it is done in a very phased manner where in we start with few trial orders and based on supplier performance, we can decide and approve a new supplier.
- This module helps you to track your Purchase orders with details such as price, quantity ordered and expected delivery dates
- Once Material is received in your organization, you can record Quantity received, accepted quantity (based on inspection).
- Supplier performance / rating shall be calculated based on Quantity, Quality, Delivery, Price and Service factors.
- Based on Supplier performance, organization needs, one can develop the Supplier Development Plan.

*This module captures data related to suppliers; purchase order details, quality and delivery performance of suppliers, supplier's performance rating and supplier's development plan.*
